JOURNAL OF APPLIED PHYSICS VOLUME 27, NUMBER 12 DECEMBER, 1956

Subject Index to Volume 27

References with (L) are to Letters to the Editor; (RR) to Research Reports; (E) to Errata

Adhesion
Adhesion and contact error in length metrology, C. F. Bruce and B. S. Thornton—853
Announcements—196, 312, 424, 553, 664, 842, 961, 1108, 1389, 1565
Antennas
Cross section of colinear arrays at normal incidence, J. M. Minkowski and E. S. Cassedy—313
Gap problem in antenna theory, L. Infeld and J. L. Synge—310(L)
Gap problem in antenna theory, Ronold King—310(L)
Simplified calculation for Dolph-Tchebycheff arrays, G. J. van der Maas and H. Gruenberg—962(L)

Ballistics
Missile guidance by three-dimensional proportional navigation, F. P. Adler—500
Optimum rocket trajectories, B. D. Fried and J. M. Richardson—955
Perturbations of a satellite's orbit due to the earth's oblateness, L. Blitzer, M. Weisfeld, and A. D. Wheelon —1141
Biophysics
Invariants in experimental data on linear kinetics and the formulation of models, M. Berman and R. Schoenfeld—1361
Uses of carbon replicas in electron microscopy, D. E. Bradley—1399

Colloids
Collection efficiency of aerosol particles and resistance to flow through fiber mats, J. B. Wong, W. E. Ranz, and H. F. Johnstone—161
Combustion
Emissivity of hydrogen atoms at high temperatures, H. Aroeste and W. C. Benton—117
Ignition of combustible gases by converging shock waves, J. A. Fay and E. Lekawa—261
Phase contrast observations of flames, M. J. Saunders and A. G. Smith—115
Computing Techniques and Machines
High speed coincident-flux magnetic storage principals, L. P. Hunter and E. W. Bauer—1257
Spin echo serial storage memory, A. G. Anderson, R. L. Garwin, E. L. Hahn, J. W. Horton, G. L. Tucker, and R. M. Walker—196(E)
Contact Electrification (see Electrical Contacts)
Crystals and Crystal Growth
Effect of growth imperfections on the strength of aluminum single crystals, M. Lauriente and R. B. Pond—950
Effects of growth rate on crystal perfection and lifetime in germanium, A. D. Kurtz, S. A. Kulin, and B. L. Averbach —1287
Electromagnetic suspension of a molten zone, W. G. Pfann and D. W. Hagelbarger—12
Filamentary growths on metals at elevated temperatures, S. M. Arnold and S. Eloise Koonce—964(L)

Crystals and Crystal Growth (continued)
Floating zone melting of solids by electron bombardment, M. Davis, A. Calverley, and R. F. Lever—195(L)
Formation of p-n junctions in semiconductors by the variation of crystal growth parameters, H. E. Bridgers —746
Growth bends in iron whiskers, George S. Baker—1561(L)
Growth of large diameter silicon and germanium single crystals, W. R. Runyan—1562(L)
Hexagonal distant packing of synthetic latexes, J. F. Hamilton and F. A. Hamm—190(L)
Hexagonal microstructure of ice crystals grown from the melt, F. K. Truby—555(E)
Melting patterns appearing on single crystals of InSb, M. F. Millea and C. T. Tomizuka—96(L)
Preparation and inspection of high-purity copper single crystals, J. H. Wernick and H. M. Davis—149
Spirals developed on single crystals of copper by heating to high temperatures in high vacuums, F. W. Young, Jr.—554(L)
Vapor phase crystal growth of germanium from thermally decomposed germane, M. Davis and R. F. Lever—835(L)

Dielectrics and Dielectric Breakdown in Insulators
Anelasticity and dielectric loss of quartz, R. K. Cook and J. H. Wasilik—836(L)
Controlled field emission in hexane, W. B. Green—921
Detailed structure of copolymers from dielectric measurements, R. N. Work and Y. M. Tréhu—1003
Dielectric constant of barium orthosilicate, C. P. Hadley, H. W. Kraner, and M. R. Royce—1384(L)
Dielectric properties of a lattice of anisotropic particles, Z. A. Kaprielian—24
Dynamic method for measuring the pyroelectric effect with special reference to barium titanate, A. G. Chynoweth— 78
Effective dielectric constant of heterogeneous media, Robert S. Smith—824
Extension of the "thin-sample method" for the measurement of initial complex permeability and permittivity, E. E. Conrad, C. S. Porter, N. J. Doctor, and P. J. Franklin —346
Formative time lags in the electric breakdown of liquid hydrocarbons, R. W. Crowe—156
Influence of molecular structure upon the electric strengths of liquid hydrocarbons, A. H. Sharbaugh, R. W. Crowe, and E. B. Cox—806
Limit-periodic dielectric media, R. Redheffer—1136
Mechanism of electrical breakdown in saturated hydrocarbon liquids, T. J. Lewis—645
Mechanism of frictional electrification of dielectric liquids, F. M. Ernsberger—418(L)
Motion of electrons and holes in photographic emulsion grains, J. F. Hamilton, F. A. Hamm, and L. E. Brady —874
Recent studies of random noise between metals and dielectrics, S. I. Reynolds—728
Transient electric currents from plastic insulators, R. J. Munick—1114

Diffusion
Application of the Boltzmann-Matano analysis to vapor-solid diffusion couples, H. Fara and R. W. Balluffi— 964(L)
Concerning a systematic error in measuring diffusion constants, D. S. Tannhauser—662(L)
Correlation between frequency factor and activation energy for solute diffusion, R. A. Swalin—554(L)
Diffusion effects in drift mobility measurements in semiconductors, J. P. McKelvey—341
Diffusion of aluminum in single crystal silicon, R. C. Miller and A. Savage—1430
Diffusion of donor and acceptor elements in silicon, C. S. Fuller and J. A. Ditzenberger—544
Diffusion of gold in single crystals of silver, F. E. Jaumot, Jr., and A. Sawatzky—1186
Solubility and diffusivity of gold, iron, and copper in silicon, J. D. Struthers—1560(L)

Elasticity and Inelasticity
Anelasticity and dielectric loss of quartz, R. K. Cook and J. H. Wasilik—836(L)
Application of dislocation theory to internal friction phenomena at high frequencies, A. Granato and K. Lücke—789
Conference on ultrasonic energy losses in crystalline materials, R. Truell—1565(RR)
Dependence of Young's modulus and internal friction of copper upon neutron bombardment, D. O. Thompson and D. K. Holmes—191(L)
Dislocation damping, J. Weertman and E. I. Salkovitz —1251(L)
Dynamic elastic moduli of iron, aluminum, and fused quartz, D. S. Hughes and C. Maurette—1184
Effect of electron irradiation on Young's modulus, H. Dieckamp and A. Sosin—1416
Effect of pressure on glass structure, O. L. Anderson—943
Effect of strain rate on the propagation of a plastic strain pulse along a lead bar, B. E. K. Alter and C. W. Curtis —1079
Effect of stress on the expansion coefficient, A. R. Rosenfield and B. L. Averbach—154
Effects of neutron irradiation upon the Young's modulus and internal friction of copper single crystals, D. O. Thompson and D. K. Holmes—713
Elastic compliance of polymethyl methacrylate, J. M. Watkins—419(L)
Neutron-induced discomposition in graphite. II. Preliminary studies of elastic modulus, T. J. Neubert, R. C. Hirt, and A. R. Van Dyken—568
Neutron-induced discomposition in graphite. IV. Further studies of elastic modulus and electrical resistivity, M. G. Bowman, W. R. Burns, R. C. Hirt, T. J. Neubert, A. Novick, J. Royal, and A. R. Van Dyken—569
Scattering of a plane longitudinal wave by a spherical obstacle in an isotropically elastic solid, C. F. Ying and R. Truell—1086
Strain-amplitude dependent internal friction studies of dilute alloys of copper, S. Weinig and E. S. Machlin—734
Theory of mechanical damping due to dislocations, A. Granato and K. Lücke—583

Electrical Circuits and Networks
Concavity of resistance functions, C. E. Shannon and D. W. Hagelbarger—42
Concavity of resistance functions, H. M. Melvin—658(L)
Even-order subharmonic oscillations, W. J. Cunningham —1374
Ferromagnetic coupling between crossed coils, U. F. Gianola and D. B. James—608
Technique for approximate measurement of correlation coefficients, T. P. Goodman—773
Transient behavior in a ferroresonant circuit, J. G. Skalnik —508
Tuned circuits containing negative resistance, Josef Gross —603

Electrical Conductivity
Effect of quenching on the resistivity of Au–Cd, M. S. Wechsler and T. A. Read—194(L)
Electrical conductivity of barium oxide single crystals as a function of temperature and excess barium density, R. T. Dolloff—1418
Energy gap and electrical conductance of hexagonal germanium dioxide, H. A. Papazian—1253(L)

Hall effect and conductivity in porous media, H. J. Juretschke, R. Landauer, and J. A. Swanson—838(L)
Measurement of electric constants of thin metallic films, G. Bonfiglioli, E. Coen, and R. Malvano—201
Neutron-induced discomposition in graphite. III. Preliminary studies in electrical resistivity, T. J. Neubert, M. G. Bowman, A. R. Van Dyken, and J. Royal—569
Physical properties of titanium II. Hall coefficient and resistivity, Georgiana W. Scovil—1196
Resistance thermometer for transient high-temperature studies, J. Rabinowicz, M. E. Jessey, and C. A. Bartsch —97(L)
Resistivity effects of short-range order in α brass, A. C. Damask—610
Stress annealing in copper films, R. W. Hoffman and H. S. Story—193(L)
Thermoelectric power and electrical resistivity of dilute alloys of Mn, Pd, and Pt in Cu, Ag, and Au, F. A. Otter, Jr.—197

Electrical Contacts

Bridge and short arc erosion of copper, silver, and palladium contacts on break, W. B. Ittner, III—382
Electrostatic charge separation at metal-insulator contacts, P. E. Wagner—1300
New low contact resistance electrode, S. S. Flaschen and L. G. Van Uitert—190(L)
Some recent studies of random noise between metals and dielectrics, S. I. Reynolds—728
Two distinct types of short arcs, L. H. Germer and W. S. Boyle—32
Vapor lubrication of graphite sliding contacts, R. H. Savage and D. L. Schaefer—136

Electrical Discharges in Gases

Analysis of the plasma of fluorescent lamps, J. F. Waymouth and F. Bitter—122
Breakdown of air at microwave frequencies, L. Gould and L. W. Roberts—1162
Bridge and short arc erosion of copper, silver, and palladium contacts on break, W. B. Ittner, III—382
Discharge mechanism of mercury pool arcs, K. G. Hernqvist —1226
High-frequency gas discharge breakdown in neon-argon mixtures, H. J. Oskam—848
Oscillating glow discharge plasma, A. B. Stewart—911
Plasma oscillations at extremely high frequencies, M. A. Lampert—5
Positive ion transit time in glow discharge tubes, Chai Yeh—98(L)
Two distinct types of short arcs, L. H. Germer and W. S. Boyle—32
Velocity distribution of the electrons in gas discharge plasmas from probe curves, G. Medicus—1242
Xenon arc transients, electrical and optical, G. W. LeCompte and H. E. Edgerton—1427

Electromagnetic Waves

Atmospheric attenuation of solar millimeter wave radiation, H. H. Theissing and P. J. Caplan—538
Backscattering for arbitrary angles of incidence of a plane electromagnetic wave on a perfectly conducting spheroid with small eccentricity, Yasuto Mushiake—1549
Dielectric properties of a lattice of anisotropic particles, Z. A. Kaprielian—24
Čerenkov radiation from extended electron beams near a medium of complex index of refraction, H. Lashinsky —631
Dielectric properties of a lattice of anisotropic particles, S. B. Cohn—1106(L)
Diffraction by a wide slit, S. N. Karp and A. Russek—886
Diffraction pattern in the plane of a half-screen, L. R. Lewis—837(L)
Diversity reception with correlated signals, H. Staras— —93(L)
Effective dielectric constant of heterogeneous media, R. S. Smith—824
Electromagnetic transmission characteristics of a lattice of infinitely long conducting cylinders, Z. A. Kaprielian —1491
Extremely low-frequency electromagnetic waves. I. Reception from lightning, L. Liebermann—1473
Extremely low-frequency electromagnetic waves. II. Propagation properties, L. Liebermann—1477
First correction to the geometric-optics scattering cross section from cylinders and spheres, S. I. Rubinow and T. T. Wu—1032
Limit-periodic dielectric media, R. Redheffer—1136
Molecular ringing, S. Bloom—785
Reflectionless transmission through dielectrics and scattering potentials, I. Kay and H. E. Moses—1503
Scattering theorems for bounded periodic structures, V. Twersky—1118
Theory of scattering by an inhomogeneous solid possessing fluctuations in density and anisotropy, M. Goldstein and E. R. Michalik—839(E)
Turbulent mixing theory applied to radio scattering, R. A. Silverman—699
Variational method for the calculation of the distribution of energy reflected from a periodic surface, W. C. Meecham —361
Vector wave solutions and separable coordinates, R. C. Hansen—555(RR)

Electron and Ion Optics

Electron optical image of an atomic beam, L. Marton, D. C. Schubert, and S. R. Mielczarek—419(L)
Favorable condition for seeing simple molecules in a field emission microscope, J. A. Becker and R. G. Brandes— 221
Investigation of nonrotationally symmetrical electrostatic electron optical lenses, R. F. Whitmer—808
Magnification and resolution of the field emission electron microscope, D. J. Rose—215
Measurement of the image rotations produced by the lenses of a magnetic electron microscope, R. Miller and J. W. Sharpe—860

Electron Beams

Čerenkov radiation from extended electron beams near a medium of complex index of refraction, H. Lashinsky —631
Effect of cathode roughness on the maximum current density in an electron beam, G. W. Preston—627
Electron cyclotron as a source of megavolt bunched electron beams, I. Kaufman and P. D. Coleman—1250(L)
Excitation of space charge waves in drift tubes, M. Scotto and P. Parzen—375
Focusing of low energy electron beams, W. W. H. Clarke and L. Jacob—1519
Instability in hollow and strip electron beams, C. C. Cutler—1028
Plasma oscillations at extremely high frequencies, M. A. Lampert—5
Space charge effects in dense, velocity-modulated electron beams, M. Weinstein and H. M. Von Foerster—344
Stability of periodic-field beam focusing, K. K. N. Chang —1527

Electron Diffraction

Electron diffraction patterns of CuO, J. M. Cowley—422(L)

Electron Emission

Conduction mechanism in oxide-coated cathodes, E. B. Hensley—286
Dielectric constant of barium orthosilicate, C. P. Hadley, H. W. Kraner, and M. R. Royce—1384(L)

Electron Emission (continued)
Donor concentration changes in oxide-coated cathodes resulting from changes in electric field, H. J. Krusemeyer and M. V. Pursley—1537
Effect of cathode roughness on the maximum current density in an electron beam, G. W. Preston—627
Effect of strain on the work function of polycrystalline silver, G. Wallis and H. E. Farnsworth—594
Electrical conductivity of barium oxide single crystals as a function of temperature and excess barium density, R. T. Dolloff—1418
Emission of oxide cathodes supported on a ceramic, G. E. Moore and H. W. Allison—1316
Equivalent circuit for the oxide-coated cathode, R. E. J. King—308(L)
Impregnated barium dispenser cathodes containing strontium or calcium oxide, I. Brodie and R. O. Jenkins—417(L)
New mechanism for the generation of flicker noise in tubes with oxide-coated cathodes, W. W. Lindemann and A. van der Ziel—1179
Preparation and properties of thin film MgO secondary emitters, P. Wargo, B. V. Haxby, and W. G. Shepherd—1311
Principal electron donors in the oxide cathode, R. H. Plumlee—659(L)
Pulsed *T-F* emission electron projection microscopy, W. P. Dyke and J. P. Barbour—356
Radioactive isotope study of the dissociation of barium oxide under electron bombardment, S. Yoshida, N. Shibata, Y. Igarashi, and H. Arata—497
Resistance of semitransparent photocathodes, W. J. Harper and W. J. Choyke—1358
Electron Microscope Society of America, Proceedings of the Fourteenth Annual Meeting—1389
Electron Microscopy
Abstracts of papers presented at the Meeting of the Electron Microscopy Society of America—1389
Favorable condition for seeing simple molecules in a field emission microscope, J. A. Becker and R. G. Brandes—221
Magnification and resolution of the field emission electron microscope, D. J. Rose—215
Measurement of the image rotations produced by the lenses of a magnetic electron microscope, R. Miller and J. W. Sharpe—860
Pulsed *T-F* emission electron projection microscopy, W. P. Dyke and J. P. Barbour—356
Replica technique for systematic examination of a surface under the electron microscope, Florence Nesh—1252(L)
Resolution of the atomic structure of a metal surface by the field ion microscope, E. W. Müller—474
Technique for making surface replicas from comparatively small objects, I-Ming Feng—472
Uses of carbon replicas in electron microscopy, D. E. Bradley—1399
Electron Tubes
Detector for hydrogen penetrating steel, J. O. McCaldin—307(L)
Effect of the cathode work function on the space-charge-limited characteristics of plane diodes, C. R. Crowell—93(L)
Flicker noise in secondary emission tubes and multiplier phototubes, R. C. Schwantes, H. J. Hannam, and A. van der Ziel—573
Flicker noise in vacuum photoelectric diodes, R. J. J. Zijlstra and C. T. J. Alkemade—656(L)
Penetration of electrons and ions in aluminum, J. R. Young—1
Potential distribution between parallel planes in electron tubes, P. L. Copeland, L. M. Sachs, and E. C. Czech—816
Electrostatics
Charged right circular cylinder, W. R. Smythe—917
Properties of a coaxial-torus capacitor, W. E. Waters, Jr.—1211
Explosives and Explosions
Damping of underwater explosion bubble oscillations, J. B. Keller and I. I. Kolodner—1152
Detonation wave fronts in ideal and nonideal detonation, M. A. Cook, G. S. Horsley, R. T. Keyes, W. S. Partridge, and W. O. Ursenbach—269
Experimental test of the theory of penetration by metallic jets, R. J. Eichelberger—63
Hardness plateaus and twinning in steel by explosives with lined cavities, S. Singh, N. R. Krishnaswamy, and A. Soundraraj—617
Impact phenomena at high speeds, M. E. Van Valkenburg, W. G. Clay, and J. H. Huth—1123
Polymorphism of iron at high pressure, D. Bancroft, E. L. Peterson, and S. Minshall—291
Temperature effects in the liquid explosive, nitromethane, A. W. Campbell, M. E. Malin, and T. E. Holland—963(L)
Ferroelectricity
Anomalous polarization in undiluted ceramic $BaTiO_3$, H. L. Blood, S. Levine, and N. H. Roberts—660(L)
Discontinuous field-induced transitions in barium titanate above the Curie point, M. E. Drougard—1559(L)
Dynamic method for measuring the pyroelectric effect with special reference to barium titanate, A. G. Chynoweth—78
Effect of pile irradiation on the dielectric constant of ceramic $BaTiO_3$, F. T. Rogers, Jr.—1066
Polarization reversal in the barium titanate hysteresis loop, R. Landauer, D. R. Young, and M. E. Drougard—752
Retarded polarization phenomena in $BaTiO_3$ crystals, H. H. Wieder—413
Switching time in ferroelectric $BaTiO_3$ and its dependence on crystal thickness, W. J. Merz—938
Theory of nonlinear coupling in a novel ferroelectric device, W. H. Higa—775
Time changes in thin films of $BaTiO_3$, C. Feldman—870
Ferromagnetic Materials and Ferrites
Broad-band nonreciprocal phase shifts—analysis of two ferrite slabs in rectangular guide, S. Weisbaum and H. Boyet—519
Effect of magnetic field strength during condensation on the coercivity and form of vapor-deposited iron, A. J. Griest, J. F. Libsch, and G. P. Conard—1022
Energy concentration effects in ferrite loaded wave guides, J. L. Melchor, W. P. Ayres, and P. H. Vartanian—72
Extension of the "thin-sample method" for the measurement of initial complex permeability and permittivity, E. E. Conrad, C. S. Porter, N. J. Doctor, and P. J. Franklin—346
Ferrite post in a rectangular wave guide, P. S. Epstein and A. D. Berk—1328
Ferromagnetic coupling between crossed coils, U. F. Gianola and D. B. James—608
Frequency doubling in ferrites, W. P. Ayres, P. H. Vartanian, and J. L. Melchor—188
Investigations on barium ferrite magnets, K. J. Sixtus, K. J. Kronenberg, and R. K. Tenzer—1051
Maximum energy product of crystal-oriented polycrystalline Ticonal G (Alnico 5) magnet steel, H. Zijlstra—1249(L)
Mechanism by which cobalt ferrite heat treats in a magnetic field, H. J. Williams, R. D. Heidenreich, and E. A. Nesbitt—85

Method for forming large ferrite parts for microwave applications, L. G. Van Uitert, F. W. Swanekamp, and F. R. Monforte—1385(L)
On the minimum of magnetization reversal time, R. Kikuchi —1352
Motion of ferromagnetic domain walls in 48 Ni-Fe tapes, R. W. Cole—1104(L)
New low contact resistance electrode, S. S. Flaschen and L. G. Van Uitert—190(L)
Nickel copper ferrites for microwave applications, L. G. Van Uitert—723
Reversibility of the coercive force in Alnico 5, M. G. van der Steeg and K. J. de Vos—1250(L)
Temperature behavior of ferrimagnetic resonance in ferrites located in wave guide, B. J. Duncan and L. Swern—209

Fluid Dynamics
Approximate theory on the stability of interfacial waves between two streams, Chan-Mou Tchen—1533
Chemical surface reactions in laminar boundary layer flows, P. L. Chambré and A. Acrivos—1322
Cover photograph, B. R. Parkin, B. Perry, and T. Yao-Tsu Wu—306
Measurement of wall shearing stress in the boundary layer by means of an evaporating liquid film, J. S. Murphy and A. M. O. Smith—1097
Pressure distribution on a hydrofoil running near the water surface, B. R. Parkin, B. Perry, and T. Yao-Tsu Wu—232
Resolution of an initial shear flow discontinuity in one-dimensional hydromagnetic flow, J. Bazer—1565(RR)
Stability of oscillations of superposed fluids, Chan-Mou Tchen—760
Velocity discontinuity instability of a liquid jet, B. Dunne and B. Cassen—577

Fluid Flow, Low Speed
Chemiluminescence as a tool in the study of liquid flow boundaries, A. S. Friedman—417(L)
Concerning laminar flow in channels with porous walls, Abraham S. Berman—1557(L)
Flow of immiscible fluids in porous media: exact solution of a free boundary problem, R. E. Kidder—867
Further investigation of laminar flow in channels with porous walls, S. W. Yuan—267
Physical theory for capillary flow phenomena, E. E. Miller and R. D. Miller—324
Principle of electromagnetic flowmeter without external magnet, A. Kolin—965(L)

Fracture
Propagation of cleavage cracks in crystals, J. J. Gilman—1262

Friction and Wear
Autocorrelation analysis of the sliding process, E. Rabinowicz—131
Investigation of the mechanism of MoS_2 lubrication in vacuum, V. R. Johnson and G. W. Vaugn—1173
Law of adhesive wear, H. P. Bhattacharyya—661(L)
Law of adhesive wear, John T. Burwell—1561(L)
Mechanism of frictional electrification of dielectric liquids, F. M. Ernsberger—418
Role of hydrodynamic lubrication in the friction of fibers and yarns, W. W. Hansen and D. Tabor—1558(L)
Surface film formation and metallic wear, W. Hirst and J. K. Lancaster—1057
Vapor lubrication of graphite sliding contacts, R. H. Savage and D. L. Schaefer—136

Geophysics
Atmospheric attenuation of solar millimeter wave radiation, H. H. Theissing and P. J. Caplan—538
Experiments on the displacement of the ultraviolet absorption edge of olivine at high pressures, S. K. Runcorn—598
Flow patterns in glacier ice, L. E. Nielsen and F. D. Stockton—448; 1386(L)
Forces that move a glacier, A. Nadai—1386(L)
Motion of the interface between immiscible liquids of unequal density in a porous solid, R. E. Kidder—1546
Upper-air density and temperature by the falling-sphere method, F. L. Bartman, L. W. Chaney, L. M. Jones, and V. C. Liu—706

Liquids
Controlled field emission in hexane, W. B. Green—921
Equation for predicting a mean drop size in a high-speed spray, D. B. Harmon, Jr.—310(RR)
Film boiling of water by pulse-heating small wires, E. A. McLean, V. E. Scherrer, and C. E. Faneuff—193(L)
Formative time lags in the electric breakdown of liquid hydrocarbons, R. W. Crowe—156
Free fall breakup of large drops, R. H. Magarvey and B. W. Taylor—1129
Influence of molecular structure upon the electric strengths of liquid hydrocarbons, A. H. Sharbaugh, R. W. Crowe, and E. B. Cox—806
Mechanism of electrical breakdown in saturated hydrocarbon liquids, T. J. Lewis—645
Motion of the interface between immiscible liquids of unequal density in a porous solid, R. E. Kidder—1546
Slippage of water over nonwettable surfaces, E. Schnell—1149
Ultrasonic relaxation in normal propyl alcohol, T. Lyon and T. A. Litovitz—179
Velocity discontinuity instability of a liquid jet, B. Dunne and B. Cassen—577

Lubrication (see Friction and Wear)

Luminescence
Chemiluminescence as a tool in the study of liquid flow boundaries, Abraham S. Friedman—417(L)
Penetration of electrons and ions in aluminum, J. R. Young —1

Magnetic Resonance
Paramagnetic resonance of lattice defects in irradiated quartz, R. A. Weeks—1376
Spin echo serial storage memory, A. G. Anderson, R. L. Garwin, E. L. Hahn, J. W. Horton, G. L. Tucker, and R. M. Walker—196(E)
Temperature behavior of ferrimagnetic resonance in ferrites located in wave guide, B. J. Duncan and L. Swern—209

Magnetism (see also Ferromagnetic Materials, Magnetic Resonance)
Effect of magnetic field strength during condensation on the coercivity and form of vapor-deposited iron, A. J. Griest, J. F. Libsch, and G. P. Conard—1022
Magnetic granulometry and superparamagnetism, C. P. Bean and I. S. Jacobs—1448
Mechanism by which cobalt ferrite heat treats in a magnetic field, H. J. Williams, R. D. Heidenreich, and E. A. Nesbitt—85
Physical properties of titanium. II. Hall coefficient and resistivity, Georgiana W. Scovil—1196

Mass Spectrometry
Accurate mathematical treatment of the analyzer of the rf mass spectrometer tube, W. W. Cannon and M. K. Testerman—1283

Mathematics
Asymptotic expansions of solutions of the heat conduction equation in internally bounded cylindrical geometry, R. H. Ritchie and A. Y. Sakakura—1453
Funk-Hecke theorem in relation to the transport equation, R. L. Liboff—662(L)

Metallurgy
Application of dislocation theory to internal friction phenomena at high frequencies, A. Granato and K. Lücke—789
Copper precipitation on dislocations in silicon, W. C. Dash—1193
Correction factor for the quantitative determination of fiber textures, W. P. Chernock, J. Singer, M. H. Mueller, and P. A. Beck—1170
Creep of aluminum single crystals, J. Weertman—832
Creep of tin single crystals, J. Weertman and J. E. Breen—1189
Detector for hydrogen penetrating steel, J. O. McCaldin—307(L)
Dislocation etch pits in silicon crystals, F. L. Vogel, Jr., and L. Clarice Lovell—1413
Effect of growth imperfections on the strength of aluminum single crystals, M. Lauriente and R. B. Pond—950
Effect of neutron irradiation on the precipitation-hardening reaction in alloys containing beryllium, R. H. Kernohan, D. S. Billington, and A. B. Lewis—40
Effect of quenching on the resistivity of Au–Cd, M. S. Wechsler and T. A. Read—194(L)
Effect of strain on the work function of polycrystalline silver, G. Wallis and H. E. Farnsworth—594
Effect of stress on the expansion coefficient, A. R. Rosenfield and B. L. Averbach—154
Hardness plateaus and twinning in steel by explosives with lined cavities, S. Singh, N. R. Krishnaswamy, and A. Soundraraj—617
High pressure polymorphism of iron, P. W. Bridgman—659(L)
Growth bends in iron whiskers, G. S. Baker—1561(L)
Method of representing preferred orientation data, L. K. Jetter, C. J. McHargue, and R. O. Williams—368
Neutron diffraction study of titanium-zirconium system, S. S. Sidhu, L. Heaton, D. D. Zauberis, and F. P. Campos—1040
Observations of dislocation glide and climb in lithium fluoride crystals, J. J. Gilman and W. G. Johnston—1018
Polymorphism of iron at high pressure, D. Bancroft, E. L. Peterson, and S. Minshall—291
Propagation of cleavage cracks in crystals, J. J. Gilman—1262
Quantitative study of substructure characteristics and correlation to tensile-property of nickel and nickel alloy, S. Weissmann—1335
Relationship between small-angle dislocation boundaries and creep, Bètsey Ancker, T. H. Hazlett, and E. R. Parker—333
Sensitivity of ultrasonic attenuation and velocity changes to plastic deformation and recovery in aluminum, A. Hikata, R. Truell, A. Granato, B. Chick, and K. Lücke—396
Short-range order coexisting with long-range order in Cu_3Au, B. W. Roberts and G. H. Vineyard—203
Structure of bent zinc crystal, C. T. Wei and P. A. Beck—1508
Tensile strength of whiskers, S. S. Brenner—1484
Theory of mechanical damping due to dislocations, A Granato and K. Lücke—583
Thermal aspect of fatigue, A. M. Freudenthal and J. H. Weiner—44
Two-dimensional motion of idealized grain boundaries, W. W. Mullins—900
X-ray study of the change in Cu_3Au near 600°C, B. Borie and B. E. Warren—1562(L)
X-ray study of the local atomic arrangement in partially ordered Cu_3Au, D. R. Chipman—739
Missiles (see Ballistics)
Neutron Diffraction
Neutron diffraction study of titanium-zirconium system, S. S. Sidhu, L. Heaton, D. D. Zauberis, and F. P. Campos—1040
Noise
Excess noise in deformed germanium, J. J. Brophy—1383(L)
Excess noise in InSb, G. H. Suits, W. D. Schmitz, and R. W. Terhune—1385(L)
Flicker noise in secondary emission tubes and multiplier phototubes, R. C. Schwantes, H. J. Hannam, and A. van der Ziel—573
Flicker noise in vacuum photoelectric diodes, R. J. J. Zijlstra and C. T. J. Alkemade—656(L)
Monte Carlo calculation of noise near the potential minimum of a high-frequency diode, P. K. Tien and J. Moshman—1067
New mechanism for the generation of flicker noise in tubes with oxide-coated cathodes, W. W. Lindemann and A. van der Ziel—1179
Noise in silicon *p-n* junction photocells, G. L. Pearson, H. C. Montgomery, and W. L. Feldmann—91
Photovoltaic noise in silicon broad area *p-n* junctions, U. F. Gianola—51
Recent studies of random noise between metals and dielectrics, S. I. Reynolds—728
Results on the analysis of random signals by means of a cut-counting process, I. Miller and J. E. Freund—1290
Statistical properties of signal plus narrow band noise integrated over a finite time interval, L. C. Maximon and J. P. Ruina—1442
Technique for approximate measurement of correlation coefficients, T. P. Goodman—773
Technique for improving the signal-to-noise ratios of single-crystal photoconductive detectors, R. M. Page, R. W. Terhune, and J. Hickmott, Jr.—307(L)
Temperature dependence of flicker noise of *p-n-p* junction transistor, K. Amakasu and M. Asano—1249(L)
Use of Gram-Charlier series to represent noise, C. W. Horton—350
Nuclear Physics
Evaluation of the cross-section transformation matrices of Zweifel and Hurwitz, H. Amster—307(L); errata—663(E)
Neutron flux spectra in air, S. S. Holland, Jr., and P. I. Richards—1042
Photoneutrons from U^{233} and Pu^{239} fission products in heavy water, S. Bernstein, J. K. Leslie, C. R. McKinney, and H. K. Jackson—23
Scattering of high-energy gamma rays, David H. Green and E. C. Gregg—697
Thermal flux distribution from a fast neutron line source, G. W. Stuart—89
Yield of photoneutrons from U^{235} fission products in beryllium and deuterium, S. Bernstein, W. K. Ergen, F. L. Talbott, J. K. Leslie, and C. P. Stanford—18
Nuclear Reactor Physics
Effect of neutron interaction on criticality, G. W. Stuart—1294
Funk-Hecke theorem in relation to the transport equation, R. L. Liboff—662(L)
Gamma-ray dosage in inhomogeneous nuclear reactors, W. Primak—54
Production and properties of graphite for reactors, L. M. Currie, V. C. Hamister, and H. G. MacPherson—840(RR)
Resonance absorption of neutrons by spheres, E. P. Wigner, E. Creutz, H. Jupnik, and T. Snyder—839(E)
Solutions of the reactor kinetics equations for time varying reactivities, M. Ash—1030

Two-group diffusion in slab lattice reactors, F. B. Estabrook—175

Optical Properties

Birefringence changes during retraction of oriented polystyrene monofilaments. I. Changes of average birefringence, R. D. Andrews and J. F. Rudd—990

Birefringence changes during retraction of oriented polystyrene monofilaments. II. Changes in radial distribution of birefringence, J. F. Rudd and R. D. Andrews—996

Determination of dynamic plastic strain through the use of diffraction gratings, J. F. Bell—1109

Effect of light scattering upon the refractive index of dispersed colloidal spheres, M. Nakagaki and W. Heller—975

Energy gap and electrical conductance of hexagonal germanium dioxide, H. A. Papazian—1253(L)

Experiments on the displacement of the ultraviolet absorption edge of olivine at high pressure, S. K. Runcorn—598

Flow birefringence and stress, W. Philippoff—984

Photoconductive and photoelectromagnetic effects in InSb, S. W. Kurnick and R. N. Zitter—278

Photoconductivity speed of response for high intensity excitation in cadmium sulfide and selenide, R. H. Bube—1237

Study of shock waves by light absorption and emission, H. B. Palmer—1105(L)

Theory of scattering by an inhomogeneous solid possessing fluctuations in density and anisotropy, M. Goldstein and E. R. Michalik—839(E)

Xenon arc transients, electrical and optical, G. W. LeCompte and H. E. Edgerton—1427

X-ray analysis of sheared-compressed KCl powder crystals, James G. Kereiakes—1557(L)

Phase Transformations

Irradiation-induced phase transformation in zirconia, M. C. Wittels and F. A. Sherrill—643

Phase changes in pile-irradiated uranium-base alloys, M. L. Bleiberg, L. J. Jones, and B. Lustman—1270

Problem of intense surface heating of a slab accompanied by change of phase, J. I. Masters—477

Transformations in disordered gold copper alloys, G. C. Kuczynski, M. Doyama, and M. E. Fine—651

Plastic Deformation

Determination of dynamic plastic strain through the use of diffraction gratings, J. F. Bell—1109

Effect of strain rate on the propagation of a plastic strain pulse along a lead bar, B. E. K. Alter and C. W. Curtis—1079

Impact phenomena at high speeds, M. E. Van Valkenburg, W. G. Clay, and J. H. Huth—1123

Observations of dislocation glide and climb in lithium fluoride crystals, J. J. Gilman and W. G. Johnston—1018

Sensitivity of ultrasonic attenuation and velocity changes to plastic deformation and recovery in aluminum, A. Hikata, R. Truell, A. Granato, B. Chick, and K. Lücke—396

Polymers

Apparatus for the direct determination of the dynamic bulk modulus, J. E. McKinney, S. Edelman, and R. S. Marvin—425

Birefringence changes during retraction of oriented polystyrene monofilaments. I. Changes of average birefringence—R. D. Andrews and J. F. Rudd—990

Birefringence changes during retraction of oriented polystyrene monofilaments. II. Changes in radial distribution of birefringence—J. F. Rudd and R. D. Andrews—996

Detailed structure of copolymers from dielectric measurements, R. N. Work and Y. M. Tréhu—1003

Discontinuity in the temperature coefficient of the velocity of ultrasonic waves in polymeric materials, R. N. Work—69

Dynamic properties of various rubbers at high frequencies, J. R. Cunningham and D. G. Ivey—967

Effect of light scattering upon the refractive index of dispersed colloidal spheres, M. Nakagaki and W. Heller—975

Elastic compliance of polymethyl methacrylate, J. M. Watkins—419(L)

Flow birefringence and stress, W. Philippoff—984

Fracture in the extrusion of amorphous polymers through capillaries, J. P. Tordella—454

Hexagonal distant packing of synthetic latexes, J. F. Hamilton and F. A. Hamm—190(L)

Kinematographic study of tensile fracture in polymers, A. M. Bueche and A. V. White—980

Radiation induced conductivity in polyethylene and Teflon, R. A. Meyer, F. L. Bouquet, and R. S. Alger—1012

Stress analysis in viscoelastic materials, E. H. Lee—665

Stress relaxation in concentrated solutions of polymethyl methacrylate: Molecular weight dependence, J. M. Watkins, R. D. Spangler, and E. C. McKannan—685

Stress relaxation studies of the viscoelastic properties of polymers, A. V. Tobolsky—673

Theory of the non-Newtonian rheology of raw rubbers consisting of super-molecular rheological units, M. Mooney—691

Thermoelasticity and irreversible thermodynamics, M. A. Biot—240

Time dependence of mechanical breakdown phenomena, B. D. Coleman—862

Transient electric currents from plastic insulators, R. J. Munick—1114

Ultrasonic measurements on high polymers, P. Hatfield—192(L)

Vapor pressure of plastic materials, N. Jensen—1460

Radiation Effects in Solids

Dependence of Young's modulus and internal friction of copper upon neutron bombardment, D. O. Thompson and D. K. Holmes—191(L)

Effect of electron irradiation on Young's modulus, H. Dieckamp and A. Sosin—1416

Effect of fast neutron bombardment on physical properties of graphite: A review of early work at the metallurgical laboratory, M. Burton and T. J. Neubert—557; the abstracts of ten additional papers are on pp. 568–572

Effect of neutron irradiation on the precipitation-hardening reaction in alloys containing beryllium, R. H. Kernohan, D. S. Billington, and A. B. Lewis—40

Effect of pile irradiation on the dielectric constant of ceramic $BaTiO_3$, F. T. Rogers, Jr.—1066

Effects of neutron irradiation upon the Young's modulus and internal friction of copper single crystals, D. O. Thompson and D. K. Holmes—713

Irradiation-induced phase transformation in zirconia, M. C. Wittels and F. A. Sherrill—643

Nature of thermal spikes, C. W. Tucker, Jr., and Peter Senio—207

Paramagnetic resonance of lattice defects in irradiated quartz, R. A. Weeks—1376

Penetration of electrons and ions in aluminum, J. R. Young—1

Phase changes in pile-irradiated uranium-base alloys, M. L. Bleiberg, L. J. Jones, and B. Lustman—1270

Radiation induced conductivity in polyethylene and Teflon, R. A. Meyer, F. L. Bouquet, and R. S. Alger—1012

Radioactive isotope study of the dissociation of barium oxied under electron bombardment, S. Yoshida, N. Shibata, Y. Igarashi, and H. Arata—497

Resonant Cavities
Excitation and separation of pure high-order modes in large high-Q cavities, C. T. Zahn and W. G. Schweitzer, Jr.—929

Rheology
Apparatus for the direct determination of the dynamic bulk modulus, J. E. McKinney, S. Edelman, and R. S. Marvin—425
Flow patterns in glacier ice, L. E. Nielsen and F. D. Stockton—448; 1386(L)
Forces that move a glacier, A. Nadai—1386(L)
Fracture in the extrusion of amorphous polymers through capillaries, J. P. Tordella—454
Gradient dependence of the intrinsic viscosity of linear macromolecules, A. Peterlin and M. Čopič—434
Hypo-elastic shear, C. Truesdell—441
Interfacial waves in viscoelastic media, Chan-Mou Tchen—431
Mechanical behavior of viscoelastic fibers, F. Akutowicz—439
Stress analysis in viscoelastic materials, E. H. Lee—665
Stress relaxation in concentrated solutions of polymethyl methacrylate: molecular weight dependence, J. M. Watkins, R. D. Spangler, and E. C. McKannan—685
Stress relaxation studies of the viscoelastic properties of polymers, A. V. Tobolsky—673
Theory of deformation of a porous viscoelastic anisotropic solid, M. A. Biot—459
Theory of the non-Newtonian rheology of raw rubbers consisting of super molecular rheological units, M. Mooney—691
Time dependence of mechanical breakdown phenomena, B. D. Coleman—862
Viscometric analysis of dispersions at small shear stresses, R. R. Myers, J. C. Miller, and A. C. Zettlemoyer—468

Satellites (see Ballistics)

Semiconductor Devices
Ambipolar carrier transport through the base region of a junction transistor, W. Gärtner—1252(L)
Avalanche breakdown voltage in silicon diffused p-n junctions as a function of impurity gradient, H. S. Veloric, M. B. Prince, and M. J. Eder—895
Effect of vacuum heating and ion bombardment of germanium on point contact rectification, R. B. Allen and H. E. Farnsworth—525
Effects of low energy gas discharges on evaporated metal-semiconductor contacts, Patricia A. Hartig and R. N. Noyce—843
Formation of p-n junctions in semiconductors by the variation of crystal growth parameters, H. E. Bridgers—746
Germanium surface phenomena, Review of, R. H. Kingston—101
Noise in silicon p-n junction photocells, G. L. Pearson, H. C. Montgomery, and W. L. Feldmann—91
Open circuit transient effects in point contact rectifiers, H. L. Armstrong—420(L)
p-n junction theory by the method of δ functions, H. Reiss—530
Photovoltaic noise in silicon broad area p-n junctions, U. F. Gianola—51
Reduction of carrier lifetime in p-n junction diodes by electron bombardment, W. Miller, K. Bewig, and B. Salzberg—1524
Reverse current and carrier lifetime as a function of temperature in silicon junction diodes, E. M. Pell and G. M. Roe—768
Simple method of revealing p-n junctions in germanium, R. W. Jackson—309(L)
Technique for improving the signal-to-noise ratios of single-crystal photoconductive detectors, R. M. Page, R. W. Terhune, and J. Hickmott, Jr.—307(L)
Temperature dependence of flicker noise of p-n-p junction transistor, K. Amakasu and M. Asano—1249(L)
Theoretical considerations governing the choice of the optimum semiconductor for photovoltaic solar energy conversion, J. J. Loferski—777
Transient behavior of semiconductor rectifiers, B. R. Gossick—905
Transit time transistor, G. Weinreich—1025

Semiconductors
Conduction mechanism in oxide-coated cathodes, E. B. Hensley—286
Copper precipitation on dislocations in silicon, W. C. Dash—1193
Diffusion effects in drift mobility measurements in semiconductors, J. P. McKelvey—341
Diffusion of aluminum in single crystal silicon, R. C. Miller and A. Savage—1430
Diffusion of donor and acceptor elements in silicon, C. S. Fuller and J. A. Ditzenberger—544
Dislocation etch pits in silicon crystals, F. L. Vogel, Jr., and L. Clarice Lovell—1413
Effect of fast neutron bombardment on physical properties of graphite: A review of early work at the metallurgical laboratory, M. Burton and T. J. Neubert—557
Effects of growth rate on crystal perfection and lifetime in germanium, A. D. Kurtz, S. A. Kulin, and B. L. Averbach—1287
Electrical conductivity of barium oxide single crystals as a function of temperature and excess barium density, R. T. Dolloff—1418
Electromagnetic suspension of a molten zone, W. G. Pfann and D. W. Hagelbarger—12
Energy gap and electrical conductance of hexagonal germanium dioxide, H. A. Papazian—1253(L)
Excess noise in deformed germanium, J. J. Brophy—1383(L)
Excess noise in InSb, G. H. Suits, W. D. Schmitz, and R. W. Terhune—1385(L)
Experiments on, and a theory of, surface breakdown, C. G. B. Garrett and W. H. Brattain—299
Field induced doping of PbS layers, D. E. Martz, L. G. LaMarca, and R. S. Witte—1382(L)
Floating zone melting of solids by electron bombardment, M. Davis, A. Calverley, and R. F. Lever—195(L)
Frequency dependence of ultrasonic attenuation in germanium, A. Granato and R. Truell—1219
Growth of large diameter silicon and germanium single crystals, W. R. Runyan—1562(L)
Hall effect and conductivity in porous media, H. J. Juretschke, R. Landauer, and J. A. Swanson—838(L)
Hydrogen in germanium and silicon, J. H. Crawford, Jr., H. C. Schweinler, and D. K. Stevens—839(L)
Lifetime measurements of excess carriers in semiconductors, N. J. Harrick—1439
Measurement of minority carrier lifetime in silicon, R. L. Watters and G. W. Ludwig—489
Measurements of surface electrical properties of bombardment-cleaned germanium, J. T. Law and C. G. B. Garrett—656(L)
Melting patterns appearing on single crystals of InSb, M. F. Millea and C. T. Tomizuka—96(L)
Motion of electrons and holes in photographic emulsion grains, J. F. Hamilton, F. A. Hamm, and L. E. Brady—874
Photoconductive and photoelectromagnetic effects in InSb, S. W. Kurnick and R. N. Zitter—278
Photoconductivity speed of response for high intensity excitation in cadmium sulfide and selenide, R. H. Bube—1237

Preparation and regeneration of clean germanium surfaces, P. H. Robinson, A. J. Rosenberg, and H. C. Gatos —962(L)
Principal electron donors in the oxide cathode, R. H. Plumlee—659(L)
Production and properties of graphite for reactors, L. M. Currie, V. C. Hamister, and H. G. MacPherson—840(RR)
Resistance of semitransparent photocathodes, W. J. Harper and W. J. Choyke—1358
Review of germanium surface phenomena, R. H. Kingston —101
Solubility and diffusivity of gold, iron and copper in silicon, J. D. Struthers—1560(L)
Visual evidence of inversion layers on semiconductor materials, P. Levesque—1104(L); erratum—1560(E)
Volatile impurities in silicon and germanium, H. A. Papazian and S. P. Wolsky—1561(L)

Shock Waves
Attenuation in the shock tube: I. Laminar flow, R. N. Hollyer, Jr.—254
Detonation wave fronts in ideal and nonideal detonation, R. T. Keyes, W. S. Partridge, and W. O. Ursenbach—269
Ignition of combustible gases by converging shock waves, J. A. Fay and E. Lekawa—261
Properties of the shock transition at low temperatures, J. J. Gilvarry—1467
Resistance thermometer for transient high-temperature studies, J. Rabinowicz, M. E. Jessey, and C. A. Bartsch —97(L)
Resolution of an initial shear flow discontinuity in one-dimensional hydromagnetic flow, J. Bazer—1565(RR)
Shock location in front of a sphere as a measure of real gas effects, R. N. Schwartz and J. Eckerman—169
Shock produced by a spherical piston of radius $a(t)$, G. W. Evans II, F. D. Faulkner, B. J. Lockhart, and C. L. Perry—1345
Shock waves in the presence of ionization in monatomic gases, W. J. Guman—663(L)
Study of shock waves by light absorption and emission, H. B. Palmer—1105(L)
Vortices produced in shock diffraction, L. N. Howard and D. L. Matthews—223
Society of Rheology, Annual Meeting—425

Sound Waves
Conference on ultrasonic energy losses in crystalline materials, R. Truell—1565(RR)
Discontinuity in the temperature coefficient of the velocity of ultrasonic waves in polymeric materials, R. N. Work —69
Frequency dependence of ultrasonic attenuation in germanium, A. Granato and R. Truell—1219
Scattering of a plane longitudinal wave by a spherical obstacle in an isotropically elastic solid, C. F. Ying and R. Truell—1086
Sensitivity of ultrasonic attenuation and velocity changes to plastic deformation and recovery in aluminum, A. Hikata, R. Truell, A. Granato, B. Chick, and K. Lücke—396
Ultrasonic attenuation caused by thermoelastic heat flow, K. Lücke—1433
Ultrasonic measurements on high polymers, P. Hatfield —192
Ultrasonic relaxation in normal propyl alcohol, T. Lyon and T. A. Litovitz—179
Underwater sound reflection from a corrugated surface, E. O. LaCasce, Jr., and P. Tamarkin—138

Space Charge
Effect of the cathode work function on the space-charge-limited characteristics of plane diodes, C. R. Crowell—93(L)
Excitation of space charge waves in drift tubes, M. Scotto and P. Parzen—375
Monte Carlo calculation of noise near the potential minimum of a high-frequency diode, P. K. Tien and J. Moshman—1067
Potential distribution between parallel planes in electron tubes, P. L. Copeland, L. M. Sachs, and E. C. Czech—816
Space charge effects in dense, velocity-modulated electron beams, M. Weinstein and H. M. Von Foerster—344

Spectra and Spectroscopy
Analysis of the plasma of fluorescent lamps, J. F. Waymouth and F. Bitter—122
Emissivity of hydrogen atoms at high temperatures, H. Aroeste and W. C. Benton—117
Molecular ringing, S. Bloom—785

Surface Properties
Effect of vacuum heating and ion bombardment of germanium on point contact rectification, R. B. Allen and H. E. Farnsworth—525
Effects of low-energy gas discharges on evaporated metal-semiconductor contacts, P. A. Hartig and R. N. Noyce —843
Electrical cleanup of gases in an ionization gauge, J. R. Young—926
Experiments on, and a theory of, surface breakdown, C. G. B. Garrett and W. H. Brattain—299
Low-angle x-ray scattering by surface defects, W. H. Robinson and R. Smoluchowski—657(L)
Measurements of surface electrical properties of bombardment-cleaned germanium, J. T. Law and C. G. B. Garrett—656(L)
Mechanism of electrolytic rectification, D. A. Vermilyea —963(L)
Method for measurement of the rate of drying of surface coatings, J. R. Jenness, Jr.—1371
Preparation and regeneration of clean germanium surfaces, P. H. Robinson, A. J. Rosenberg, and H. C. Gatos—962(L)
Review of germanium surface phenomena, R. H. Kingston —101
Selective oxidation of silver-magnesium alloys in water vapor, Masaki Hirashima—95(L)
Slippage of water over nonwettable surfaces, E. Schnell —1149
Spirals developed on single crystals of copper by heating to high temperatures in high vacuums, F. W. Young, Jr. —554(L)
Visual evidence of inversion layers on semiconductor materials, P. Levesque—1104(L); erratum—1560(E)

Thermal Conductivity and Thermal Conduction
Asymptotic expansions of solutions of the heat conduction equation in internally bounded cylindrical geometry, R. H. Ritchie and A. Y. Sakakura—1453
Experiments on thermal contact at low temperatures, R. Berman—318
Neutron-induced discomposition in graphite. V. Thermal conductivity measurements, A. R. Van Dyken, M. G. Bowman, T. J. Neubert, and A. Novick—570
Problem of intense surface heating of a slab accompanied by change of phase, J. I. Masters—477

Thermodynamic Properties
Dynamic temperature response of a vacuum calorimeter, J. S. Kouvel—639
Thermoelasticity and irreversible thermodynamics, M. A. Biot—240

Thermoelectricity
Cascading of Peltier couples for thermoelectric cooling, B. J. O'Brien, C. S. Wallace, and K. Landecker—820

Thermoelectricity (continued)
Thermoelectric power and electrical resistivity of dilute alloys of Mn, Pd, and Pt in Cu, Ag, and Au, F. A. Otter, Jr.—197
Thermoelectric power of AuCu in nonequilibrium states, H. Cooper, P. Schwed, and R. W. Webeler—516
Transmission Lines and Wave Guides
Broad-band nonreciprocal phase shifts—analysis of two ferrite slabs in rectangular guide, S. Weisbaum and H. Boyet—519
Energy concentration effects in ferrite loaded wave guides, J. L. Melchor, W. P. Ayres, and P. H. Vartanian—72
Extension of the "thin-sample method" for the measurement of initial complex permeability and permittivity, E. E. Conrad, C. S. Porter, N. J. Doctor, and P. J. Franklin—346
Ferrite post in a rectangular wave guide, P. S. Epstein and A. D. Berk—1328
Propagation coefficient in a wave guide of finite conductivity, A. E. Karbowiak—421(L)
Temperature behavior of ferrimagnetic resonance in ferrites located in wave guide, B. J. Duncan and L. Swern—209
Turbulence
Turbulent mixing theory applied to radio scattering, R. A. Silverman—699

Vacuum Technique
Electrical cleanup of gases in an ionization gauge, J. R. Young—926
Equilibrium between glass and water vapor at bake-out temperatures, B. J. Todd—1209
Investigation of the mechanism of MoS_2 lubrication in vacuum, V. R. Johnson and G. W. Vaughn—1173
Vapor pressure of plastic materials, N. Jensen—1460
Vibrations
Free vibrations of isotropic cubes and nearly cubic parallelepipeds, H. Ekstein and T. Schiffman—405
Simple modes of vibration of crystals, R. D. Mindlin—1462
Viscosity and Viscoelasticity
Gradient dependence of the intrinsic viscosity of linear macromolecules, A. Peterlin and M. Čopič—434
Interfacial waves in viscoelastic media, Chan-Mou Tchen—431
Mechanical behavior of viscoelastic fibers, F. Akutowicz—439
Stress analysis in viscoelastic materials, E. H. Lee—665
Stress relaxation studies of the viscoelastic properties of polymers, A. V. Tobolsky—673
Theory of deformation of a porous viscoelastic anisotropic solid, M. A. Biot—459
Viscoelastic properties of ice, H. H. G. Jellinek and R. Brill—1198
Viscometric analysis of dispersions at small shear stresses, R. R. Myers, J. C. Miller, and A. C. Zettlemoyer—468

X-Rays and X-Ray Diffraction
Comparison of x-ray wavelengths for powder diffractometry, W. Parrish and T. R. Kohler—1215
Convergent-beam x-ray analysis of mosaic structure in polycrystals, C. R. Berry—636
Correction factor for the quantitative determination of fiber textures, W. P. Chernock, J. Singer, M. H. Mueller, and P. A. Beck—1170
Effect of dispersion and geometric intensity factors on x-ray back-reflection line profiles, A. R. Lang—485
High-resolution microradiography using low-voltage x-rays, A. Engström and R. C. Greulich—758
Improved method for plotting reciprocal lattice points, W. G. Martin—514
Low angle x-ray scattering by surface defects, W. H. Robinson and R. Smoluchowski—657(L)
Method for the study of lattice inhomogeneities combining x-ray microscopy and diffraction analysis, S. Weissmann—389
Method of representing preferred orientation data, L. K. Jetter, C. J. McHargue, and R. O. Williams—368
Quantitative study of substructure characteristics and correlation to tensile-property of nickel and nickel alloy, S. Weissmann—1335
Small-angle x-ray scattering, R. Dean Dragsdorf—620
Variation of extinction with x-ray wavelength, A. Authier and B. E. Warren—1382(L)
X-ray analysis of sheared-compressed KCl powder crystals, J. G. Kereiakes—1557(L)
X-ray study of the change in Cu_3Au near 6000°C, B. Borie and B. E. Warren—1562(L)
X-ray study of the local atomic arrangement in partially ordered Cu_3Au, D. R. Chipman—739
